14XZ00117/GEM-0295 Appln Serial No. 09/964,071 Amendt. dated 05/ / / 2007

Reply to Office Communications of 04/14/2003 and 11/18/2003

Amendment to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

1 (currently amended): <u>The An electric transformer winding according to claim 27 comprising:</u>

(a) at least one each plate having of electric insulating material with a hole bored in the middle. ; and

(b) an electric conductor placed on at least one side of the plate and spiral wound, the turns of which are electrically insulated from one another.

2 (canceled).

3 (canceled).

4 (canceled).

5 (canceled). .

6 (canceled). .

7 (currently amended): The electric winding according to claim 6 27 wherein one plate presents a notch at the outer point of the spiral, while the adjacent plate presents a notch at the inner point of the spiral, so as to make the conductor pass from one plate to the adjacent plate on the coil winding operation.

8 (canceled).

9 (canceled).

10 (currently amended): The electric winding according to claim $\frac{1}{27}$ wherein the electric conductor is of circular cross-section.

11 (currently amended): The electric winding according to claim 2 27 wherein the bottom of the groove has the shape of a semicircle.

12 (canceled).

13 (currently amended): The electric winding according to claim $\frac{1}{27}$ wherein the plate has the shape of a disk, the periphery of which is circular.

14 (currently amended): The electric winding according to claim 1 27 wherein the plate has the shape of a disk, the periphery of which is oval.

15 (canceled).

16 (currently amended): The electric winding according to claim $\frac{1}{27}$ wherein the bore of the plate has a contour adapted to that of the support on which it is mounted.

17 (canceled).

18 (currently amended): The electric winding according to claim 17 27 wherein the electric insulator of high thermal conductivity which fills the space is in solid form at the temperature of use.

19 (canceled).

14XZ00117/GEM-0295 Appln Serial No. 09/964,071 Amendt. dated 05/ / / 2007 Reply to Office Communications of 04/14/2003 and 11/18/2003

20 (canceled).

21 (currently amended): The electric winding of claim 2 <u>27</u> wherein adjacent spiral-shaped grooves are separated by an insulator.

22 (currently amended): The electric winding of claim 4 <u>27</u> wherein the electric conductor is an insulated conductor.

23 (currently amended): The electric winding of claim 4 <u>27</u> wherein the electric conductor is provided with insulation between the turns.

24 canceled).

25 (canceled).

- 26 (currently amended) The electric winding of claim 6 27 wherein an electric current formed in the conductors create a magnetic field in each plate, the magnetic fields being additive.
- 27 (currently amended): An electric <u>transformer</u> winding <u>for voltage on the</u> <u>order of 100 Kv or more</u> comprising:
- (a) a plurality of juxtaposed plates, each plate having a spiral-wound electric conductor and made of a material having a high thermal conductivity;
 - (b) the spirals of the conductor being substantially the same;
- (e) the conductors being wound from outside <u>in</u> on one plate and from inside out on <u>an adjacent</u> the juxtaposed plate;
- (d) each of the plurality of plates having a spiral-shaped groove in which conductor is accommodated;
 - (e) each of the spiral-shaped grooves being substantially the same;

14XZ00117/GEM-0295 Appln Serial No. 09/964,071 Amendt. dated 05/ / / 2007 Reply to Office Communications of 04/14/2003 and 11/18/2003

- (f) means for assembling juxtaposed plates to one another; and
- (g) an insulator in a space between juxtaposed plates.

a wall separating adjacent spiral grooves on each plate, the wall forming a space between adjacent plates for receiving in the space a product having a high thermal conductivity; and

means for assembling juxtaposed plates to one another.
